

### **Car thefts - warning**

We've had 2 car thefts in St Georges Road recently one at No 12 and the second at No. 23. The cars were taken from the driveways. The police have told my neighbours that criminals now have a device which will scan car keys through wood so they can hold the device against a front door and scan the car keys inside. This is not possible through metal so police have recommended keeping keys inside something metal.
